

# Autonomy:

*From dull, dirty and dangerous  
to smart, simple and secure*

Kory Mathews  
Vice President, Autonomous Systems  
April 18, 2017

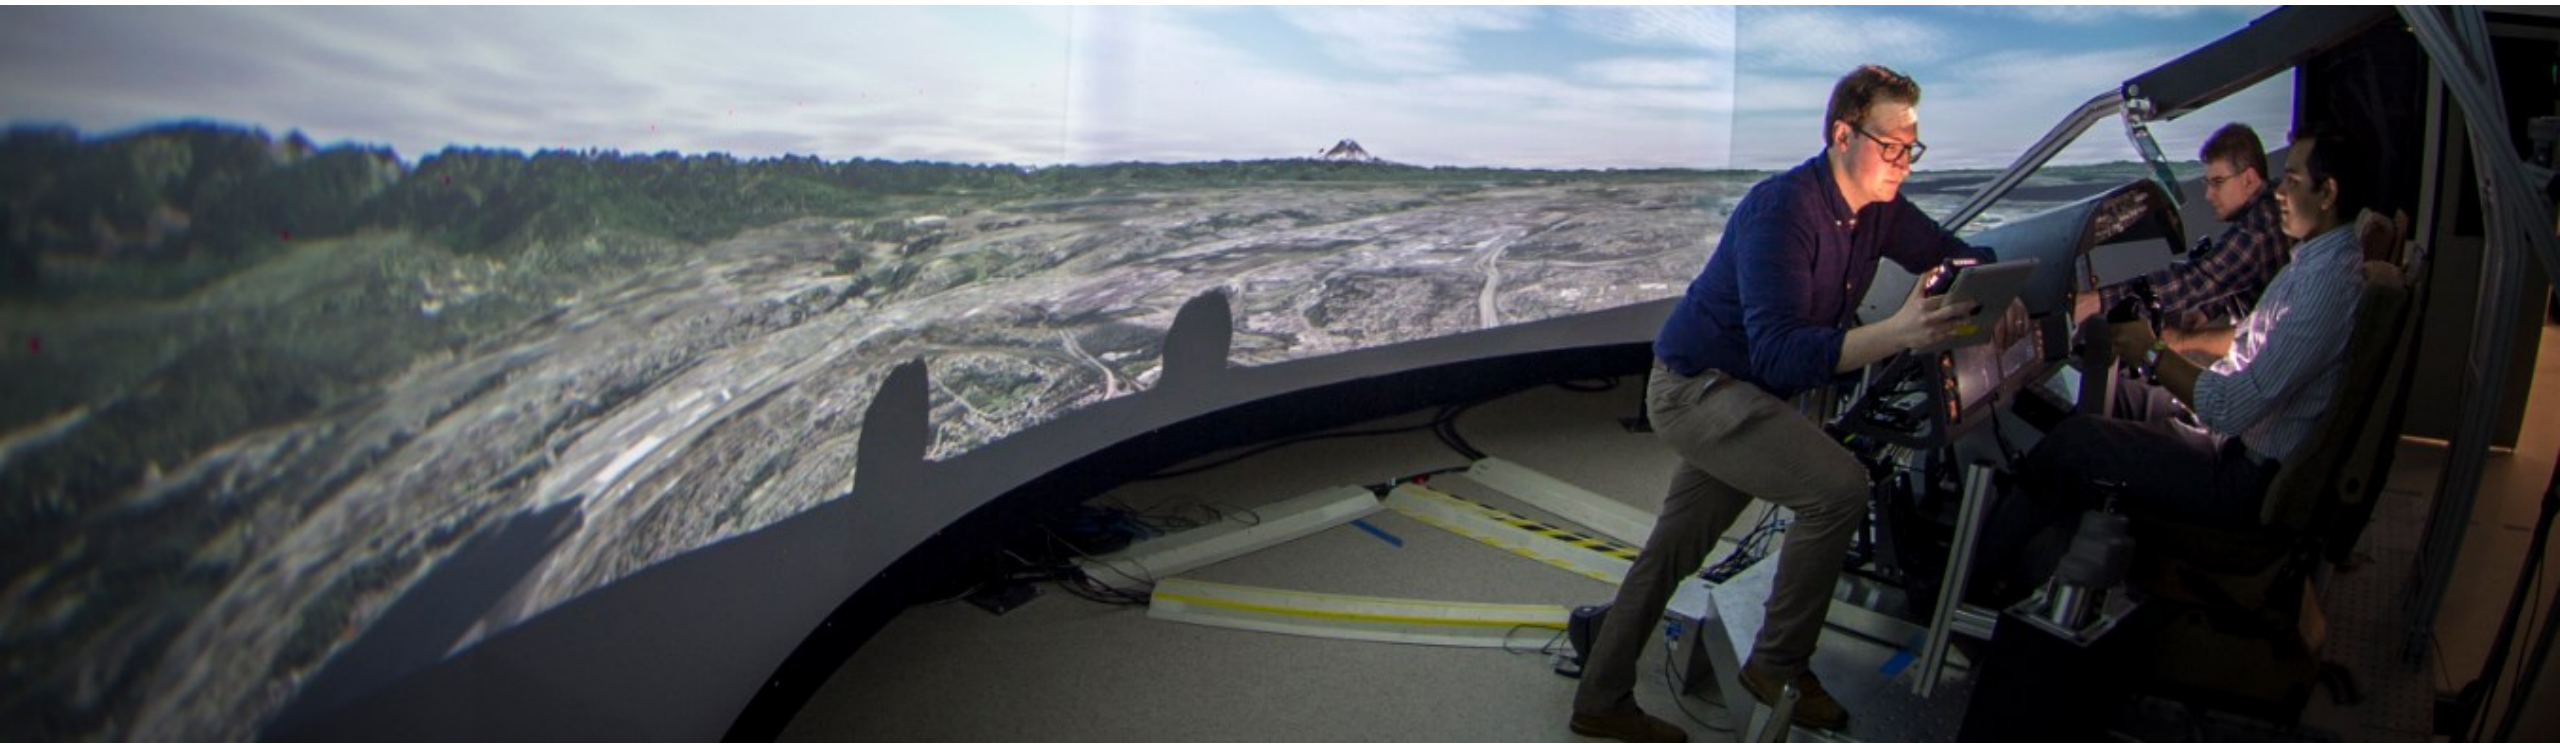

# Automation to Autonomy: A Progression

# Getting Autonomy Right

- Increasing platform capabilities – with purpose
- Building the networks in which they collaborate
- Integrating the airspace in which they operate

## Building the Foundation to Get it Right

- Establishing partnerships to gain speed and agility
- Tolerating risk in program development and procurement
- Pursuing both incremental and disruptive approaches to autonomy

# Journey to Autonomy:

*An intricate network of decisions that will change the way humans connect, protect and explore in the future*
