Autonomy:

*From dull, dirty and dangerous to smart, simple and secure*

Kory Mathews
Vice President, Autonomous Systems

Automation to Autonomy: A Progression
Getting Autonomy Right

• Increasing platform capabilities – with purpose
• Building the networks in which they collaborate
• Integrating the airspace in which they operate
Building the Foundation to Get it Right

- Establishing partnerships to gain speed and agility
- Tolerating risk in program development and procurement
- Pursuing both incremental and disruptive approaches to autonomy
Journey to Autonomy:

An intricate network of decisions that will change the way humans connect, protect and explore in the future
