

## **Alfredo Giuliano**

Alfredo Giuliano began his career as a flight control systems engineer for medium-size certified helicopters at AgustaWestland—where he later led the conversion of a light single engine helicopter into an OPA (optionally piloted aircraft). He is knowledgeable on all aspects of the control and operations of helicopters and UAS. Alfredo now leads the Intelligent Systems Group at Aurora Flight Sciences. His talented team are designing vision operations for urban air mobility, vertiport control, and a Fleet Command Center.
