

CONVERGENT AERONAUTICS SOLUTIONS SHOWCASE

NOVEMBER 13-14, 2019
NASA AMES RESEARCH CENTER BUILDING 152

Discover with us as NASA researchers share their high-potential capabilities and ideas overcoming key barriers associated with large-scale aeronautics problems. This showcase will feature live pitches from NASA researchers sharing information about revolutionary new technologies and focuses on merging traditional aeronautics disciplines with advancements driven by the non-aeronautics world to make possible new capabilities in commercial aviation. The presentation and feedback sessions will provide NASA an opportunity to receive updates on the feasibility studies conducted under CAS sponsorship.
