

Srini Ananth

Srinivas Ananth is a Director at Intel Capital. His current areas of investment include Autonomous Systems, Next Gen Computing, Urban Mobility, and Vertical AI. Srini is actively engaged in the early-stage startup community. Srini has over a decade of operating experience in high-tech industry—spanning product development and management as well as business development across a diverse set of technologies such as cybersecurity, IoT, mobile, and media. At Intel, Srini led a product launch for a security software-as-a-service, and he fostered partnerships to support Intel's entry into the mobile business. As an electrical engineer, Srini designed components that powered millions of mobile phones and tablets, generating more than \$1.5B in revenue at Texas Instruments.
