

William Chan

Mr. William Chan is the Project Manager for the ATM-X project. Previously, William held multiple Branch Chief positions at NASA Ames where he supervised air traffic management research groups. After earning with Bachelor degrees in Aeronautical Engineering and Physics from Cal Poly in San Luis Obispo, he went to work as a flight test engineer for the C-17 program at Edwards Air Force Base. He learned his stomach did not enjoy flight testing as much as the rest of him. Afterwards, he completed an M.S. in Meteorology from San Jose State University where he coincidentally focused his research on aviation turbulence.
